

Amazing Animals

From the myths and legends of Wolves to the extinction of the wild Chinchillas of the Andes Mountains, the Amazing World of Animals will astonish the students and teachers while exploring the fascinating and diverse habitats of the world and the adaptations animals use to survive in their unique environments. The presenter will also discuss the relationship between humans, pets, and wild animals and what we can do to help promote the 3 C's; compassion, conservation, and coexistence with animals.

The Amazing world of Animals will showcase a variety of live animals and talk about their survival, natural history, geography, natural behaviors, and conservation education. Each presentation will feature 5-6 live animal ambassadors from the following list. Animal selection varies dependent on state and federal regulations.

- Wolf
- Patagonian Cavy
- Red Tegu
- Wood Chuck
- Andes Mountain Chinchilla
- Tortoise
- Bird species
- Reptile species
- Porcupine
- Hedgehog
- Bird of prey
- Feline species

"Our students are always excited when animal life comes into our school. The huge snake and wolf were especially big hits. Kids are still talking about the show a week later, thanks again!"

– Amy Youkilis, PTA, Bellingham, MA

"The presenter was the best we have ever had at our school. He arrived on time, was flexible, knew how to handle children of all ages (including the adults), and was especially knowledgeable about handling the animals. We had nothing but rave reviews. We would love to have him come again!"

– Sue Ellen Newman, Director, Hoboken, NJ

"The presenter and show were beyond our expectations. He had incredible crowd control and was able to show us all of his animals. We especially enjoyed all of the facts he gave us about the animals and I have to give him extra credit for keeping every student's full attention for the length of the program!"

– Connie Henry, Principal, Mechanicsburg, PA
