

The Bureau of Lectures & Mutual of Omaha presents

# Rainforest Animals

This award-winning, highly entertaining and educational show will allow the students to meet some of the world's most exciting and fascinating rainforest animals. Wonders of the Rainforest will showcase live animals and products from the rainforest around the world and talk about their survival, natural history, geography, natural behaviors and conservation education. We promote awareness and enthusiasm for wildlife conservation education, both at the grass roots community level and on a national scale.

Each presentation will feature live animal ambassadors from the rainforests around the world. The show will consist of 5 - 6 rainforest animals. The following animal list is subject to change due to individual state and federal regulations.

- Macaw
- Hornbill
- Iguana
- Snake
- Honey Bear
- Rainforest Arthropods
- Rainforest Reptiles
- Rainforest Amphibians
- Brazilian Badger

*"As a teacher, one of the most fun aspects of the program was the many times my students turned to me with big eyes and mouths wide open – full of wonder. The presenter did an excellent job of handling the large age range and of keeping her poise managing a large audience with a large spider on her hand! She commanded respect and treated the animals respectfully. Thank you!"*  
– Jenny Plooy, Teacher, Hanford, CA

*"The presentation was incredibly informative and the presenter was marvelous. She was a model of respectful, responsible treatment of the animals and was as good with our students as any presenter we have ever had. Excellent assembly!"*  
– Claudia Stupi, Principal, Wooster, OH
