

# Magic of Learning

World renowned illusionist, Christian Augustine, joins the roster of The Bureau of Lectures in bringing his new show, “The Magic of Learning.” In his show, Christian will be using magic and illusions that incorporate math, science and physics – as well as interesting stories about history to entertain and educate your students and staff. His show will also have lots of audience participation along with a strong emphasis on reading. Some of the magical effects Christian will present are *The Impossible Puzzle*, *Intelligent Electricity*, *The Power of Nine* and many more. This is a great opportunity to inspire your students to explore their favorite subjects in school in a brand new way.

*“Christian was professional, age appropriate for our students and incredibly entertaining. His performance was a perfect blend of mathematics and magic. Students were educated while being highly entertained. Magic of Math is, dollar for dollar, the best assembly performance we have ever had. Thank you so much!”—Principal - Paoli, IN*

*“Wow! None of our students were ready for occasionally dry school subjects to be so fun! Teachers and students were both still talking about the show days later.”—Principal – Lincoln, Nebraska*

*“Thank you so much for the opportunity to bring this amazing show to our school. I’ve never seen our students so excited to try new math problems!”—Principal, Bronx, NY*
